

In-Class Project ~ Life in the Thirteen Colonies Prezi

➤ Your colony:

Designing A Multimedia Presentation

After researching your colony, it is time to create a dynamic advertising presentation to attract settlers. You will use Prezi to combine pictures and commentary about your colony's history. The overall combination of important facts, engaging language, and appealing pictures should convince people to choose your colony.

- 1) After signing in to the Prezi app, click "New Prezi" in the upper right corner. Pick a template from the drop-down menu. If you want, you can customize your template with images and layouts.
- 2) Then, tap each area of the presentation field to enter text or pictures. Include facts and pictures for each of your topics on the research journal.
- 3) Experiment with layout and design. Think about how to group facts and arrange images.
- 4) Use the "path" function to move from item to item, zooming in and out. Alternate between catchy slogans, short text, and images.
- 5) Click the "home" button in the upper left corner to "Save and Exit."
- 6) From the file page, click the gear wheel to give your Prezi a title and a description. In order to publish and embed your Prezi, it eventually should be marked "Public."
- 7) Ask Mr. Hall for any questions or help in creating a terrific presentation.
